

I²PCC Presents Cleantech in Flanders

I²PCC 项目展现比利时
法兰德斯清洁技术实力

Content - 内容

About I²PCC

I²PCC – connecting cleantech companies between Belgian and Chinese partner regions

I²PCC is a joint project of the Belgian provinces of Antwerp, Limburg, East Flanders and Flemish Brabant. It enables cleantech companies from these provinces to become acquainted with the potential and importance of the Chinese market, in order to stimulate actual collaborations and Belgian-Chinese projects. To do so, the provinces work closely together with their partners in the Chinese sister regions.

The cleantech sector in Flanders is characterized by many new, small companies and ranks very high in terms of innovation. By stimulating and supporting internationalization, companies are given the opportunity to expand the scope of their innovations and strengthen Flanders as an innovative region.

Due to the high degree of urbanization that China has experienced over the past 30+ years, China is an interesting and important market for Flemish cleantech companies. The objective of I²PCC is also perfectly aligned with the 2025 Made in China strategy and the shift to more green manufacturing projects in China. The expertise and experience of Flemish companies can support the Chinese regions in the realization of green factories and green industrial parks and projects to promote energy efficiency, environmental protection, resource usage, remanufacturing and low-carbon technologies.

All Flemish provinces have a partnership with a sister region in China - often spanning over multiple years - with an emphasis on economic cooperation. I²PCC also specifically focusses on these sister regions, being Chengdu, Chongqing, Guangdong, Hebei and Shaanxi. This network establishes a unique bridge between the Flemish and Chinese cleantech industry.

The I²PCC-project receives European funding (ERDF) and is supported by Cleantech Flanders and Flanders Investment & Trade.

About Cleantech in Flanders

Provinces with an interesting cleantech industry

Cleantech Flanders

Cluster Organisations

Powered by **VITO**

General overview

Powered by VITO, and in collaboration with companies, research institutes, public bodies and civil society actors, Cleantech Flanders is a catalyst for innovation and implementation of clean technologies in society. It is our mission to promote and stimulate the implementation of clean technologies that accelerate the transition to a sustainable world.

Main activities in cleantech

We operate across sectors on multiple cleantech domains, including energy, materials, mobility and water.

Mission of Cleantech Flanders

Cleantech Flanders: your gateway to the Flemish cleantech ecosystem.

关于I²PCC比中清洁技术合作项目

I²PCC —— 为法兰德斯和中国友好省市间的清洁技术企业搭建桥梁

I²PCC是比利时安特卫普省、林堡省、东弗兰德省和法兰德斯布拉班特省的一个联合项目。旨在促进该区域清洁技术企业与中国潜在合作伙伴的相互了解与认知，以推动比利时-中国双边合作与项目的实施。为实现该目标，项目各成员单位将于他们在中国的友好省市合作伙伴展开密切合作。

法兰德斯清洁技术产业的特点是：初创企业数量多、企业规模小、创新能力高及技术领先！通过支持这类企业走国际化路线，有助加速企业开拓创新领域，从而有效地稳固法兰德斯地区在清洁技术创新领域的市场地位。

基于中国过去30多年来的城镇化发展，中国已经成为法兰德斯清洁技术企业相当具吸引力的目标市场。I²PCC的目标也正与中国制造2025战略相契合，与绿色制造的发展目标相一致。法兰德斯企业的专业技术和经验，可以帮助中国各地区实现绿色工厂、绿色工业园区和项目的愿景，从而提升能源效率、环境保护、资源有效利用、再制造和低碳技术的普及。

法兰德斯下辖各省都与中国的相关省市建立了友好合作关系，有着多年经济合作往来。I²PCC项目将优先把友好省（市）作为合作重点，其中包括：成都市、重庆、广东省、河北省和陕西省。通过这几个区域的网络和纽带，为法兰德斯和中国之间的清洁技术产业建立起合作的桥梁。

I²PCC项目由欧洲区域发展基金(ERDF)鼎力支持，并于与法兰德斯投资贸易局(FIT)以及法兰德斯清洁技术协会(Cleantech Flanders)展开密切合作。

Cleantech Flanders

产业集群

Powered by VITO

简介

法兰德斯清洁技术协会(Cleantech Flanders)在法兰德斯技术研究院(VITIO)的支持下，与企业、研究机构、公共组织、社会团体进行合作，推动清洁技术在社会中的创新与应用。我们的使命是促进清洁技术的实际应用，加快向可持续发展世界转型。

核心清洁技术业务

我们的工作涉及到了清洁技术的各个领域，包括能源技术、材料技术、交通运输和水技术。

协会任务

法兰德斯清洁技术协会：通往佛兰芒清洁技术生态系统的门户

Blue Foot Membranes

Water Industry

Type Company

Website www.bluefootmembranes.com

Contact Patrick Vanschoubroek

Mail pvs@bluefootmembranes.com

General overview

Blue Foot Membranes (BFM) produces and commercializes the world patented IPC® membranes. IPC® membranes are the world's first fully back pulsable PVDF flat sheet membranes. The IPC® membranes are incorporated in BFM's patented water filtration modules. Although the initial market for IPC® modules are waste water plants (Membrane BioReactor), IPC® technology can be used in different filtration applications as well.

IPC® modules installed in new and existing MBR's can:

- Improve fouling control
- Double the output capacity per m2
- Significantly lower total cost of ownership
- Allow for peak water management.

Main activities in cleantech

fully back pulsable PVDF flat sheet membranes & modules

Chinese partner search

Blue Foot Membranes is looking for customer and strategic partnerships to launch IPC® technology in China.

简介

Blue Foot Membranes (BFM) 公司对IPC® 膜技术进行生产及商业化运营。IPC® 膜是全世界首个能达到反冲洗效果的平板膜产品。IPC® 膜与BFM 专利的水过滤模块结合。虽然我们的产品主要针对于污水处理厂（膜生物反应器）应用，IPC® 还可在其他不同的过滤应用发挥其作用。因为产品可实现反冲洗效果，IPC® 膜组件可以直接安装在新或现有生物反应器内：

- 提升膜污染控制力
- 每平米过滤流量效率可提升一倍
- 整体拥有成本可以显著下降
- 可实现到高峰用量管理

核心清洁技术：

全反冲洗PVDF平板膜及膜组件

合作伙伴需求

我们希望可以找到中国客户及战略合作伙伴，共同在中国市场开发IPC® 技术

General overview

Ultrasound destruction of **BIOFILM AND BACTERIA**

(in industry, agriculture, marine)

Main activities in cleantech

Ultrasound eradication of mineral deposits caused by bacteria in **boreholes** (waterwells) Avoid attachment of micro-organism such as Calcium in heat-exchangers, pipelines & tanks, coolingtowers, ship-hulls, ... **Avoid bacterial contamination** in waterlines and tanks for **livestock** which results in less antibiotics

Advantages:

- no bio-film: less deposits, less maintenance
- better water quality
- sustainable solution to reduce chemicals

Chinese partner search

Expand business in China

简介

使用高频超声波处理生物膜及细菌的污染，可广泛应用于工业、农业及船舶业，将化学药剂的使用降到最小。

核心清洁技术：

用高频超声波对管道及输水设施内壁表面细菌与矿物质结合形成的水垢进行处理，有效避免微生物粘附在热交换器，管道、液体储存罐，冷却塔及船身表面等。

高频超声波技术能够有效避免家畜养殖用水管及液体罐箱的细菌污染

我们的优势：

- 避免生物膜形成：减少水垢形成、降低管道维修需求
- 明显改善水质
- 用可持续发展的方式减少化学药剂的使用

合作伙伴需求

愿意在中国使用这种技术拓展市场的合作伙伴

Mail patrick.swartenbroekx@hydroscan.be

General overview

World-leading expert in holistic, integrated solutions for sustainable water management. As water engineers we apply our expertise through advanced modelling in a unique combination with smart, cloud technology-driven real-time alert systems. Libovito is HydroScan's certified distributor in China

Main activities in cleantech

- **Smart water supply** – non-revenue water reduction with LeakRedux[®]
- **Operational Flood management** – Real-time flooding prediction in urban areas with Flood4Cast[®]
- **Urban drainage** – preventive sewer asset management with HidroView[®]
- **Integrated Water Management Services** – modelling, wateraudit, benchmarking, masterplanning, ..

Chinese partner search

Development Bureau of Housing and Urban-Rural, Water Affairs Dept.
Flood Contingency and Control Dept. of the municipality government or related companies

简介

HydroScan是一家世界领先的专业公司，主要提供完成集成的可持续水管理方案。作为水工程师，HydroScan将先进的建模技术与云技术主导的智能实时警报系统结合起来，使我们的专业知识得到应用。北京立博威拓环境技术有限公司是HydroScan在中国的授权经销商。

核心清洁技术：

智能水供应--利用LeakRedux[®]减少无收益水

洪水管理--利用Flood4Cast[®]进行城镇地区实时洪水预测

城镇排水--利用HidroView[®]进行下水道资产管理

集成水管理服务--建模、用水审计、标杆管理、整体规划等等

NDV Ultrasonic

Water Industry & sustainable agriculture

Type company

Website www.ndvultrasonic.com

Contact Nick De Vos

Mail nick@ndvultrasonic.com

General overview

We break down the Biofilm from water without using chemicals

Main activities in cleantech

Fighting Biofilm in water without chemicals, but with High Frequency Ultrasound. In a warm climate, pipes and installations can suffer from algae growth, lime scale and bacteria formation. NDV Ultrasonic offers solutions for all industries and private users, that keep installations completely clean: No bacterial colonies can occur, no lime plaque is present and no thread algae in the water.

With transducers on High Frequency Ultrasound, NDV Ultrasonic keeps tubes, coolers, ships, industry, ponds, swimming pools, etc. free of algae, lime and bacteria, and this without using chemicals.

Chinese partner search

Looking for regional dealers in different regions in China to distribute NDV Ultrasonic.

简介

NDV Ultrasonic 将生物膜从水中分解出来，这一过程没有用到任何化学药剂。

核心清洁技术：

在不使用任何化学药剂的情况下，消灭水中的生物膜，我们使用的是高频超声技术。在温暖的气候里，管道和一些输水设施会受到水藻、水垢和细菌的侵蚀。

NDV Ultrasonic为各类产业和私人用户提供解决方案，使您的设备时刻保持清洁：没有细菌群落滋生，没有水垢没有水藻。

有了高频超声设备中变频器的帮助，NDV Ultrasonic能够使管道、饮水冷却器、船只、池塘、游泳池等远离水藻、水垢和细菌等等。整个过程都不用化学药剂。

合作伙伴需求

在中国各地区寻找地区经销商，分销 NDV Ultrasonic产品。

ROAM technology

Water Industry & Agriculture

Type company

Website <https://www.roamtechnology.com>

Contact +32 (0)89/44.00.42

Mail info@roamtechnology.com

General overview

Roam Technology creates effective and sustainable disinfection solutions for various applications such as horticulture, livestock, healthcare, pharma & cosmetics, water, transport & travel, food & beverage, and household hygiene.

Main activities in cleantech

Huwa-San is a disinfectant based on hydrogen peroxide.

Hydrogen peroxide (H₂O₂) is a transparent, colourless and odourless disinfectant liquid which is mixable in any ratio with water. After reaction, it decomposes into water (H₂O) and oxygen (O₂). A stabilizer in the form of a small amount of silver is added. The silver is used to increase the stability of the hydrogen peroxide solution. Huwa-San is a one stop biocidal product that is effective against bacteria, fungi, yeast, spores, viruses and even mycobacteria. Therefore, our products can be used in many application fields to disinfect water, surfaces, tools and even big empty areas through vaporisation.

Chinese partner search

Distributors

简介

Roam Technology公司为园艺、畜牧业、医疗保健、制药和美妆、水、交通和旅游、食品和饮料以及家庭卫生等各种应用领域提供有效和具有可持续性的消毒方案。

核心清洁技术:

Huwa-San 是一种以双氧水为基础配方的消毒剂。

过氧化氢 (H₂O₂) 是一种透明、无色无味的消毒液体，可与水按任何比例混合。与水发生反应后，分解为水 (H₂O) 和氧 (O₂)。加入了少量的稳定剂银，以增加过氧化氢溶液的稳定性。Huwa-San 是一种一站式杀菌产品，对细菌、真菌、酵母、孢子、病毒甚至是霉菌都有效。因此我们的产品可以应用在许多领域，通过汽化的方式对水、物体表面、工具甚至大面积空地进行消毒。

Bio Org is a manufacturer of unique globally patented products and methods that generate an impact on clients cleaning process, positive footprint, productivity of employees, quality of work, ergonomics, air quality (VOC's, PM, PAX, Allergenes,...) and the impact of your building or infrastructure on your living environment. The USPs of our products:

- Unique patented products with a mix of 11 selected positive bacteria
- Unique patented and innovative cleaning method and process
- Cleaning without water, detergents or chemical products
- Positive impact on environment
- Greater efficiency at lower costs
- Healthier and greener building

Main activities in cleantech

Sustainable air treatment and cleaning product

Chinese partner search

Importers, Distributors, New business Development in Chinese markets, Cleaning and renovation companies and all companies that want to have positive impact on air quality, nature and environment.

简介

是一个全球专利产品的生产商，我们独一无二的产品可以改善客户的清洁模式，减少碳足迹，提高员工的生产力，提高工作环境质量，人体工学，及空气质量(VOC)挥发性有机化合物、PM悬浮颗粒、PAX，过敏源…)对生活建筑或基础设施的影响

产品特长：

- 独一无二的专利产品，包括11种特别挑选的有益细菌
- 独一无二的专利创新清洁技术及程序
- 过程完全不需要水、清洁剂或化学产品
- 对环境的正面影响
- 最大程度的提高效率及降低成本
- 建筑环境更健康更环保

Hamon

Air Industry

Type Company

Website www.hamon.com

Contact Amaury Le Cocq

Mail amaury.lecoq@hamon.com

General overview

Hamon designs and supplies Air Quality Systems for Power Plants and Industries: Dedusting: field erected electro-static precipitators (ESP) and fabric filters as well as standardized plug & play range.

Flue Gas Treatment: including treatment of acid gases, NO_x, heavy metals

Main activities in cleantech

Though Hamon AQS activity is totally related to clean technology, we want to focus on Dedusting: Heavy Oil Ignition in ESPs (prevention of fumes at low temperatures)

Flue Gas Treatment: Our company has an unrivaled experience in AQS systems for Waste Incineration plant for which we cover the full range of pollutants.

简介

哈蒙公司(Hamon)为发电厂和各个产业提供空气质量系统；
除尘：

现场架设静电除尘器(ESP)、织物过滤器和标准即插即用炉
废气处理：包括酸性气体、氮氧化物、重金属气体

核心清洁技术业务

虽然哈蒙空气质量系统主要与清洁技术有关，哈蒙公司还会关注以下领域：

除尘：静电除尘器中的重油点火（防止低温点燃时冒烟）

废气处理：在为垃圾燃烧工厂提供空气质量系统方面有着无与伦比的经验，能够处理各类污染物。

Bio2Clean

Soil Industry

Type company

Website www.bio2clean.be

Contact Dirk Dubin

Mail info@bio2clean.be

General overview

Bio2clean is a spin-off from Hasselt University and stands for the remediation of soil and groundwater in a qualitative, sustainable and environmentally friendly way. We offer a wide range of services: from feasibility studies to the complete realization of a soil remediation by means of (bacterial assisted) phytoremediation. Phytoremediation has been in the spotlight for several years as an innovative, environmentally friendly, sustainable and low-cost remediation alternative to current remediation methods. Phytoremediation offers many advantages in terms of quality of the living environment, natural capital, biodiversity and ecosystem services.

Main activities in cleantech

Soil remediation

Chinese partner search

- Businesses with (organic) pollution in soil/groundwater
- Interested in Nature Based Remediation techniques

简介

Bio2clean 是比利时哈瑟尔特大学的衍生企业，用可持续发展及绿色环保的方式对土壤修复和地下水修复。我司可提供可行性报告及全套通过（细菌）生物土壤修复的服务。

植物修复法作为创新、环保可持续发展及低成本的修复手段，这几年来已经成为热门话题。

植物修复法有非常多的优点，其中包括：美化生活环境、自然资源、生物多样性及生态系统服务

核心清洁技术：

生物（细菌）土壤修复

Act & sorb

Waste & Circular Economy

Type company

Website www.actandsorb.com

Contact Kenny Vanreppelen

Mail Kenny.Vanreppelen@act-and-sorb.com

General overview

Act&Sorb is the first company to develop a sustainable and value-adding process for re-cycling MDF by converting it into a high value activated carbon that helps provide our planet with clean air, water and soil. The upcycling process is fully self-sustaining producing additional renewable electricity. Act&Sorb is continuously developing new recycling technologies and products from waste.

Main activities in cleantech

- Waste to material with upcycling process
- Creation of additional renewable electricity

Chinese partner search

- Waste collectors/providers
- New activated carbon production plant locations
- Activated carbon users or distributors

简介

Act&Sorb是首家对中密度纤维板回收并用环保的生产方式制成高效活性炭的公司。能为我们的地球提供更清洁的空气、水和土壤。这种变废为宝的过程还可以产生额外的可再生能源。Act&Sorb致力开发本变废为宝的生产工艺。

核心清洁技术：

- 变废为宝的生产工艺，使中密度纤维板变成用途广泛的高效活性炭。
- 生产过程还可产生额外的可再生能源

合作伙伴需求

- 废料收集商或废料产生较多的工厂
- 新建的活性炭生产厂
- 高效活性炭用户或经销商

Bioelectric

Waste & Circular economy en sustainable agriculture

Type company

Website www.bioelectric.be

Contact Hans Degrande (Commercial Director)

Mail Hans.Degrande@bioelectric.be

General overview

Bioelectric is a young AgriTech scale-up that enables farmers to produce green energy on ~250 farms in 10+ countries

Main activities in cleantech

We are number 1 in Europe in developing and producing small-scale anaerobic digesters. These convert organic waste into green energy. This energy can be used both locally in the form of electricity and heat or put back on the grid. With each digester sold, we are taking the CO-2 equivalent of 200 cars out of circulation. With this cutting-edge technology, we are shaping the future of the Agro and Waste sector.

- Production of farm-scaled digesters for dairy cows and pigs
- Installation & service-after-sales

Chinese partner search

Bioelectric is looking for a Chinese partner with experience in AgriTech or Energy to help with direct sales & service (after-sales)

简介

Bioelectric是一家年轻的农业技术推广公司。全球10个国家中的250家农场正在使用碧澳的解决方案生产绿色能源。

Bioelectric在发展和生产小规模厌氧反应池方面位居欧洲第一。这些反应器能将有机废物转化为绿色能源。这些能源既可以以电力或热能的形式在当地得到利用，或者再次投入能源生产。每卖出一个反应池，就相当于减少200辆汽车产生的二氧化碳。利用这项尖端科技，Bioelectric正在重塑农业领域和废物处理领域的未来。

核心清洁技术：

- 建造农场规模的反应池，供奶牛养殖场和养猪场使用
- 安装和售后服务

合作伙伴需求：

Bioelectric正在寻找在农业科技或能源领域有经验的中国合作伙伴，帮助自己提升销售和服务（售后）

IPAS

Waste & Circular Economy

Type company

Website www.ipas.world

Contact Paul Boutsen

Mail paul@ipas.world

General overview

IPAS is a worldwide experienced designer and builder of separating and refining installations for raw materials, coal and waste with the unique WET SEPARATION TECHNOLOGY

Main activities in cleantech

- Waste refinery soil washing / remediation / sanitation
- Coal sludge recovery
- Coal washing and refining

Chinese partner search

- In general: WASTE MANAGEMENT & VALORISATION
Investment partners for DBFMO formula: Design, Build, Finance, Maintain and Operate
- Direct contacts to public authorities in WASTE MANAGEMENT

简介

IPAS公司在分类及炼提纯设施方面有丰富的设计及建设经验，这些设施可用于垃圾废物的分类、原材料精炼提纯及煤炭的提纯。

核心清洁技术业务 - 湿垃圾工业化分类技术

- 垃圾废物精炼提纯: 生活混合湿垃圾的工业化分类技术，从而提取更多可循环利用的材料及使得现有垃圾焚烧炉效率提升
- 土壤淋洗/修复/去污
- 煤矿污泥及煤矸石修复
- 洗煤及提纯
- 飞灰无害化处理

合作伙伴需求

- 普遍意义上的: 固废管理及增值
- 设计-建造-融资-运营 (DBFMO) 商类的投资伙伴
- 公共机构固废管理的直接承包商

Orbix

Waste & building Industry

orbix

Type company

Website www.orbix.be/en

Contact dept. sales and business development

Mail info@orbix.be

General overview

Orbix treats and valorises slags from stainless steel industry in Belgium for a circular economy and sustainability. Orbix has developed an innovative Carbstone technology that uses CO2 and slags to make building products with a CO2 negative footprint

Our advantage:

- Technology for slag treatment and metal recovery.
- Carbstone technology for building products with CO2 and slags:
 - Same quality as cement bounded products in the same applications
 - Lower production cost than cement bounded products
 - Implementation in an existing production plant
 - CO2 negative footprint
 - Use of second raw material (waste stream)
 - No need for cement anymore

Main activities in cleantech

- Waste to Materials

Chinese partner search

- Steel company
- Building construction company
- Waste energy plant

简介

Orbix公司对钢铁工业产生的固体钢渣进行处理，以实现循环经济及可持续发展。Orbix开发了一种创新的Carbstone碳化砖技术，将二氧化碳与钢渣为原料生产建材。生产过程可以消耗大量二氧化碳，从而实现碳足迹负增长。

该公司的优势：

- 既能处理钢渣，同时回收残余有价金属
- 碳化砖技术可以通过消耗二氧化碳生产建材
 - 碳化砖系列产品的应用范围与水泥建材的一样
 - 比水泥类建材的生产成本更低
 - 实现碳足迹负增长
 - 原材料实现二次使用（固废流向）
 - 完全不需要任何水泥作为原材料

核心清洁技术：

- 变废为宝的生产工艺，使中密度纤维板变成用途广泛的高效活性炭。
- 生产过程还可产生额外的可再生电力

OWS

Waste & Circular Economy & Energy

Type company

Website www.ows.be

Contact Bruno Mattheeuws

Mail bm@ows.be

General overview

Organic Waste Systems (OWS) is a world leading company in the construction and operation of anaerobic digestion plants, in the biodegradability and compostability testing of different types of materials, and in waste management consultancy.

Main activities in cleantech

Construction of biogas plants for household waste organics & other (semi-) dry feedstocks

Chinese partner search

OWS is looking for projects/clients in China (municipalities, waste treatment companies, etc.)

简介

OWS是一家世界一流的公司，在以下方面处于世界领先地位：厌氧分解厂的建造与运营、各类材料的生物降解性和可燃性测试和废物管理咨询。

核心清洁技术：

建造生物气工厂，处理厨余有机垃圾和其它（半干）废料

合作伙伴需求

该公司正在寻找中国项目/客户（市政当局、垃圾处理公司等等）。

Waterleau Group

Water, air, Waste & Circular Economy & energy Industry

Type private company

Website www.waterleau.com

Contact Jeroen De Lathouwer,
Director Business Development

Mail jeroen.delathouwer@waterleau.com

General overview

Waterleau is a global and leading water technology company that provides solutions for water, wastewater and the treatment of its by-products.

Main activities in cleantech

water treatment – wastewater treatment – renewable energy through anaerobic digestion (water / sludge / organic waste) – biogas treatment – turnkey solutions – engineered systems and tech packs to local partners – digital services

Chinese partner search

Looking for general contractors, in water and wastewater for municipal or industrial projects, who are interested to integrate Waterleau technologies as a tech pack in their total solution. Collaboration under license or partner agreement.

简介

Waterleau是一家国际化的水技术公司，处于世界领先地位，为水处理、污水处理和相关副产品处理提供方案。

核心清洁技术：

水处理--污水处理--通过厌氧分解生产可再生能源（水/淤渣/有机废物）--生物气处理--整套解决方案--为本地客户提供工程师设计的系统和技术套餐--数字服务

合作伙伴需求

寻找市政项目或工业项目的水和污水处理项目总承包商，只要想将Waterleau技术纳入自己的整体方案中。通过公司授权或者伙伴协定的形式达成合作。

General overview

Ultrasound destruction of **BIOFILM AND BACTERIA**

(in industry, agriculture, marine)

Main activities in cleantech

Ultrasound eradication of mineral deposits caused by bacteria in **boreholes** (waterwells) Avoid attachment of micro-organism such as Calcium in heat-exchangers, pipelines & tanks, coolingtowers, ship-hulls, ... **Avoid bacterial contamination** in waterlines and tanks for **livestock** which results in less antibiotics

Advantages:

- no bio-film: less deposits, less maintenance
- better water quality
- sustainable solution to reduce chemicals

Chinese partner search

Expand business in China

简介

使用高频超声波处理生物膜及细菌的污染，可广泛应用于工业、农业及船舶业，将化学药剂的使用降到最小。

核心清洁技术：

用高频超声波对管道及输水设施内壁表面细菌与矿物质结合形成的水垢进行处理，有效避免微生物粘附在热交换器，管道、液体储存罐，冷却塔及船身表面等。

高频超声波技术能够有效避免家畜养殖用水管及液体罐箱的细菌污染

我们的优势：

- 避免生物膜形成：减少水垢形成、降低管道维修需求
- 明显改善水质
- 用可持续发展的方式减少化学药剂的使用

NDV Ultrasonic

Water Industry & sustainable agriculture

Type company

Website www.ndvultrasonic.com

Contact Nick De Vos

Mail nick@ndvultrasonic.com

General overview

We break down the Biofilm from water without using chemicals

Main activities in cleantech

Fighting Biofilm in water without chemicals, but with High Frequency Ultrasound. In a warm climate, pipes and installations can suffer from algae growth, lime scale and bacteria formation. NDV Ultrasonic offers solutions for all industries and private users, that keep installations completely clean: No bacterial colonies can occur, no lime plaque is present and no thread algae in the water.

With transducers on High Frequency Ultrasound, NDV Ultrasonic keeps tubes, coolers, ships, industry, ponds, swimming pools, etc. free of algae, lime and bacteria, and this without using chemicals.

Chinese partner search

Looking for regional dealers in different regions in China to distribute NDV Ultrasonic.

简介

NDV Ultrasonic 将生物膜从水中分解出来，这一过程没有用到任何化学药剂。

核心清洁技术：

在不使用任何化学药剂的情况下，消灭水中的生物膜，我们使用的是高频超声技术。在温暖的气候里，管道和一些输水设施会受到水藻、水垢和细菌的侵蚀。

NDV Ultrasonic为各类产业和私人用户提供解决方案，使您的设备时刻保持清洁：没有细菌群落滋生，没有水垢没有水藻。

有了高频超声设备中变频器的帮助，NDV Ultrasonic能够使管道、饮水冷却器、船只、池塘、游泳池等远离水藻、水垢和细菌等等。整个过程都不用化学药剂。

合作伙伴需求

在中国各地区寻找地区经销商，分销 NDV Ultrasonic 产品。

Urban Crop Solutions

Sustainable agriculture

Type company

Website www.urbancropsolutions.com

Contact Brecht Stubbe

Mail brst@urbancropsolutions.com

General overview

Urban Crop Solutions is a frontrunner in indoor plant biology research and offers end-to-end solutions in the emerging vertical farming industry. We engineer, procure, and install PlantFactories and Container Farms. After commissioning, we offer full technical and biological services to ensure a grower can operate the vertical farm with ease.

Main activities in cleantech

- The best grow infrastructure that produces the healthiest and most cost-efficient leafy greens whenever and wherever you want
- Our engineers and manufactures install fully automated and integrated indoor farming systems using our LED lights that are efficient and effective under any given climate conditions.
- We have developed 200+ plant growth recipes and we offer consumables (seeds, substrates, nutrients) to produce your own crops in no time.
- Urban Crop Solutions brings added value in different industries (plant production, retail, restaurants & Food service, , Nurseries & Floriculture, ...)

简介

Urban Crop Solutions 是室内植物学研究的先驱，为新兴垂直农业行业提供端对端的解决方案。我们设计、采购、安装植物工厂和集装箱农场体系。调试之后，我们提供全方面的技术和生物服务，确保种植者能够轻松地运营垂直农场。

核心清洁技术：

最好的种植基础设施，可以随时随地生产出最健康和最具成本效益的绿叶蔬菜。

我们的工程师和制造商安装配有本公司LED灯的全自动、一体化室内种植系统，这些系统在任何特定的气候条件下都是有效、高效的。

我们开发了200多种植物生长配方，并提供并提供种子、基质、营养物质等消耗品，让您可以在短时间内生产出自己的农产品。

本公司为不同的行业创造附加值，包括植物种植、零售、餐饮和食品服务、苗圃和花卉栽培等。

合作伙伴需求

ROAM technology

Water Industry & Sustainable agriculture

Type company

Website <https://www.roamtechnology.com>

Contact +32 (0)89/44.00.42

Mail info@roamtechnology.com

General overview

Roam Technology creates effective and sustainable disinfection solutions for various applications such as horticulture, livestock, healthcare, pharma & cosmetics, water, transport & travel, food & beverage, and household hygiene.

Main activities in cleantech

Huwa-San is a disinfectant based on hydrogen peroxide. Hydrogen peroxide (H₂O₂) is a transparent, colourless and odourless disinfectant liquid which is mixable in any ratio with water. After reaction, it decomposes into water (H₂O) and oxygen (O₂). A stabilizer in the form of a small amount of silver is added. The silver is used to increase the stability of the hydrogen peroxide solution. Huwa-San is a one stop biocidal product that is effective against bacteria, fungi, yeast, spores, viruses and even mycobacteria. Therefore, our products can be used in many application fields to disinfect water, surfaces, tools and even big empty areas through vaporisation.

Chinese partner search

Distributors

简介

Roam Technology公司为园艺、畜牧业、医疗保健、制药和美妆、水、交通和旅游、食品和饮料以及家庭卫生等各种应用领域提供有效和具有可持续性的消毒方案。

核心清洁技术:

Huwa-San 是一种以双氧水为基础配方的消毒剂。过氧化氢 (H₂O₂) 是一种透明、无色无味的消毒液体，可与水按任何比例混合。与水发生反应后，分解为水 (H₂O)和氧 (O₂)。加入了少量的稳定剂银，以增加过氧化氢溶液的稳定性。Huwa-San是一种一站式杀菌产品，对细菌、真菌、酵母、孢子、病毒甚至是霉菌都有效。因此我们的产品可以应用在许多领域，通过汽化的方式对水、物体表面、工具甚至大面积空地进行消毒。

awg architecten

Sustainable building

awg architecten

General overview

Awg architecten is a leading architecture and urban design company from Belgium since 1972, active in China since 2014.

In China, we have already worked for several governments and private and state owned clients. Awg is especially accomplished in sensitive and complex urban situations with often conflicting requirements; like old versus new, density versus livability, urban versus green, etc. We achieve this with integrated design from urban design and master planning to architecture.

In China, the focus in developments is shifting more and more towards sustainability, urban quality and livability of the cities. Awg's expertise combines decades of experience in these fields in Europe, combined with a good understanding of the Chinese context

Main activities in cleantech

Integrated implementation and optimization of cleantech in master planning and architecture

Chinese partner search

Our natural partners are local governments (urban planning departments), developers (private or state-owned), and Local Design Institutes

Mail tim.van.bogaert@awg.be

简介

自1972年以来，AWG建筑设计公司（Awg architecten）一直是比利时建筑和城市设计领域的领军企业。自2014年以来活跃于中国市场。公司曾为多家中国政府、私人企业和国有企业服务。很多城市设计十分敏感、复杂，并且包含多种矛盾要求，比如，新旧交融、建筑密度与宜居性兼容、城镇和绿色共存等等，AWG在这方面颇有成就。为克服难题，我们采用从城镇设计、整体规划到建筑设计的总体设计。

中国发展的重心越来越向可持续发展、城市质量和宜居城市转移。AWG可将自己的专业知识和在欧洲几十年的从业经验与对中国市场的了解结合起来。

核心清洁技术：

清洁技术在总体规划和建筑领域的整体实施和优化。

合作伙伴需求

当地政府（城市规划部门）、开发商（私企或国营企业）、当地设计院都可以成为我们最佳的合作伙伴。

Facadeclick

Sustainable building

Type knowledge/ Patent

Website www.Facadeclick.be

Contact Patrick Vandenbempt

Mail Patrick@snelbouwsysteem.be

General overview

Speed building system has developed a patented technique to connect building blocks without mortar or glue to each other.

This technology was developed with a view to building faster and cheaper. This is due to its simplicity, but it is also completely weather-independent.

In addition, we developed our products so that it is fully circular. The materials can be dismantled and reused. Therefore these do not have to be waste after a lifecycle.

Main activities in cleantech

- development circular building system
- development Co2 neutral or negative building blocks

Chinese partner search

Franchisee china (production in house or can be outsourced)

简介

Speed building system已经研发出一种专利技术，能够在不使用钢筋水泥的情况下将建筑材料连接起来。

这项技术研发的初衷是提高建造的速度，降低成本。能做到这一点最重要的原因就是其简单性，但也很受天气条件的限制。

另外，我们的产品都是可以循环利用的，材料可以拆解开来，重新利用。因此，产品在使用寿命结束以后不会成为废物。

核心清洁技术：

发展循环建造系统

发展碳中和建材或负排放建材

General overview

We at Jaga China develop unique, high-quality heating, cooling, ventilation and smart home solutions for modern living. Jaga China advocates the change in the peoples' mindset towards the energy consumption. We hope that with our energy-efficient products we can inspire more people in changing their mentality regarding the environment. Even though Jaga is new to China, we already collaborate with some big names in the hotel industry, such as Moganshan Naked resort, Suzhou Naked resort and Nantong Riverside Intercontinental hotel. Furthermore, Jaga spread its business to Beijing, Chengdu, Wuhan, Nanjing, Hangzhou, and it expects further business expansion in the future. Today, Jaga is also very proud of its factory team that is constantly expanding. We take pride in our craftsmanship, service and design, we care for our employees and suppliers, and we also work hard to protect our planet. We believe that good design is only good if it is not harmful to the environment we live in! "less is more", less pollution for a better world!

AMS

Energy & mobility Industry

Type company

Website www.ams-innovation.com

Contact Johan Potargent

Mail johan.potargent@amsbelgium.com

General overview

AMS is a young, International and dynamic full service supplier in automation projects with several divisions worldwide. Being specialized in ROBOTICS, PLC and OFFLINE programming. The specialized in robotic molding applications can be applied for green mobility and clean production, for example hydrogen tank type 5. A new polymer transformation technology, ideal for producing lightweight parts for mobility.

Main activities in cleantech

Specialized in robotic moulding applications for green mobility solution and cleaner production.

Chinese partner search

- Automotive manufactures for Full-Cell vehicles
- Hydrogen tank producers

简介

AMS是一家年轻、国际化及充满活力的自动化项目全套服务供应商，该公司业务遍布全球。公司致力于机器人编程，PCL控制软件及脱机程序。该司特殊的机械手注塑成型技术，可应用于氢燃料电池车及清洁生产，例如生产第五代储氢缸。树脂类产品生产技术可以得到更新换代，从而为汽车行业提供超轻的部件产品。

核心清洁技术：

特有的机械手注塑成型技术，用于氢燃料电池车及清洁生产。

合作伙伴需求

- 生产研发氢燃料汽车的厂家
- 储氢缸的生产厂家

Bioelectric

Waste & Circular economy & sustainable agriculture

Type company

Website www.bioelectric.be

Contact Hans Degrande (Commercial Director)

Mail Hans.Degrande@bioelectric.be

General overview

Bioelectric is a young AgriTech scale-up that enables farmers to produce green energy on ~250 farms in 10+ countries

Main activities in cleantech

We are number 1 in Europe in developing and producing small-scale anaerobic digesters. These convert organic waste into green energy. This energy can be used both locally in the form of electricity and heat or put back on the grid. With each digester sold, we are taking the CO-2 equivalent of 200 cars out of circulation. With this cutting-edge technology, we are shaping the future of the Agro and Waste sector.

- Production of farm-scaled digesters for dairy cows and pigs
- Installation & service-after-sales

Chinese partner search

Bioelectric is looking for a Chinese partner with experience in AgriTech or Energy to help with direct sales & service (after-sales)

简介

Bioelectric是一家年轻的农业技术推广公司。全球10个国家中的250家农场正在使用碧澳的解决方案生产绿色能源。

Bioelectric在发展和生产小规模厌氧反应池方面位居欧洲第一。这些反应器能将有机废物转化为绿色能源。这些能源既可以以电力或热能的形式在当地得到利用，或者再次投入能源生产。每卖出一个反应池，就相当于减少200辆汽车产生的二氧化碳。利用这项尖端科技，Bioelectric正在重塑农业领域和废物处理领域的未来。

核心清洁技术：

- 建造农场规模的反应池，供奶牛养殖场和养猪场使用
- 安装和售后服务

合作伙伴需求：

Bioelectric正在寻找在农业科技或能源领域有经验的中国合作伙伴，帮助自己提升销售和服务（售后）

Contact Gert Nelissen

Mail gert.nelissen@borit.be

General overview

The company contributes to the Clean Energy Economy by developing a leading and efficient production infrastructure of thin metal bipolar plate assemblies for fuel cells and electrolyzers and providing excellence in metal forming, cutting, welding, coating and sealing.

Main activities in cleantech

Metal plates and assemblies for fuel cells and electrolyzers

Chinese partner search

- Significant high volume manufacturing experience with access to automotive markets
- Ambition to acquire a leading worldwide position in fuel cell technology segment
- In-road into the Chinese market including the set-up of a local production plant
- Plant in Geel(BE) remain as the technology development Center

简介

该公司致力为清洁能源经济做出贡献，公司通过开发全球领先的高效生产设施生产超薄金属双极板。产品可应用于氢燃料电池及电解制氢。公司生产设施能够实施近乎完美的金属成形、剪裁、焊接、表面处理及密封全过程。

核心清洁技术：

生产用于氢燃料电池及电解制氢产品所需的超薄金属双极板

合作伙伴需求

- 高产量及生产经验丰富的生产商，有汽车行业渠道
- 希望进入氢燃料技术领域，并在希望成为该行业世界领先地位的
- 希望进入中国市场并有意在当地建立生产的

HYDROGENICS
SHIFT POWER | ENERGIZE YOUR WORLD

Type company

Website www.hydrogenics.com

Contact Roel De Maeyer

Mail hydrogensales@hydrogenics.com

General overview

Hydrogenics is a manufacturer of hydrogen technologies. The company based in Belgium is designing and building hydrogen generators for more than 20 years under the brand name HySTAT® and has recently introduced the HyLYZER® with improved performance.

Main activities in cleantech

The HyLYZER® features a new developed 'largest in the world' proprietary PEM cell stack in the MW scale and is designed to produce clean hydrogen using renewable energy like solar and wind in a cost effective way.

Chinese partner search

The goal is to replace the conventional hydrogen production methods - out of coal or natural gas as these processes emit a lot of CO2.

简介

水吉能(Hydrogenics)是氢技术生产商，公司总部设在比利时，运用(HySTAT) 技术设计和生产各类氢气发生器有20多年的时间。水吉能最近退出了新的专利产品(HyLYZER)，提升了产品性能。

核心清洁技术：

(HyLYZER) 配有新研制的世界上最大的质子交换膜燃料电池组（百万瓦特级别中），能够利用太阳能、风能等可再生能源生产出清洁氢气，具有很高的成本效益。

合作伙伴需求

公司目标是取缔传统的用煤或天然气生产氢气的方式，因为这一过程中会产生大量的二氧化碳。

JAGA CHINA

Sustainable building & Energy

Type company

Website www.jagachina.com

Contact Nico vanherle

Mail nico@jagachina.com

General overview

We at Jaga China develop unique, high-quality heating, cooling, ventilation and smart home solutions for modern living. Jaga China advocates the change in the peoples' mindset towards the energy consumption. We hope that with our energy-efficient products we can inspire more people in changing their mentality regarding the environment. Even though Jaga is new to China, we already collaborate with some big names in the hotel industry, such as Moganshan Naked resort, Suzhou Naked resort and Nantong Riverside Intercontinental hotel. Furthermore, Jaga spread its business to Beijing, Chengdu, Wuhan, Nanjing, Hangzhou, and it expects further business expansion in the future. Today, Jaga is also very proud of its factory team that is constantly expanding. We take pride in our craftsmanship, service and design, we care for our employees and suppliers, and we also work hard to protect our planet. We believe that good design is only good if it is not harmful to the environment we live in! "less is more", less pollution for a better world!

Main activities in cleantech

heatpump technology and smart home

Chinese partner search

construction companies

简介

雅凯中国为现代生活开发独特、高品质的供暖、制冷、通风和智能家居解决方案。

雅凯中国倡导人们改变对能源消耗的观念。我们希望公司生产的节能产品能鼓舞更多的人改变对环境的看法。

虽然雅凯刚进入中国市场，但其实我们已经与一些知名酒店开展了合作，如莫干山裸心谷度假村、苏州裸心谷度假村和南通滨江洲际酒店。此外，雅凯还将业务扩展到北京、成都、武汉、南京和杭州，预计未来还会有进一步的业务拓展。如今，雅凯也为自身不断扩充的工厂团队感到无比自豪。

我们以自己的工艺、服务与设计为荣，我们关心员工与供应商，也努力保护我们所居住的地球。我们坚信只有不对环境造成污染的设计才是优秀的设计！

“少即是多”，减少污染，创造更美好的世界！

Turbulent

Energy Industry

Type company

Website www.turbulent.be

Contact Wim Heyvaert

Mail wim.heyvaert@turbulent.be

General overview

Development of its patented micro hydropower turbine projects by using very low height differences in rivers (~2 - 4m) to generate local renewable energy without impact on the ecosystem. USPs of our solution are:

- Compact, robust, turn key micro hydropower turbines with minimal maintenance requirements (half the size needed compared with competitors)
- Cost efficient generation of renewable energy
- Fish friendly turbine capable of handling debris and sedimentation
- Limited civil works requirements

Main activities in cleantech

Micro Hydropower development for renewable energy

Chinese partner search

Looking for companies in construction, energy or water sector with knowledge of the hydrology and topography needed for the implementation of hydropower projects.

简介

拥有自己的微型水电机组专利，可应用于低水位流域（2-4米深度）沿岸，以产生当地可再生能源，并对周边环境及水生态环境不造成任何影响 技术独特之处：

- 结构小巧、坚固的交钥匙微型水利涡轮机，维修需求最小化（机型比市场同类竞争产品小一倍）
- 可再生能源的低成本效益化
- 鱼类友好型的涡轮机组，能够处理碎屑及沉淀物
- 土建要求低

核心清洁技术：

开发微型水电机组产生可再生能源

VYNCKE NV

Energy Industry

General overview

VYNCKE is a 4th generation family company based in Flanders. Since 1912 years we are designing, manufacturing and installing biomass & SRF to energy plants all over the world. Today we have around 4,200 references providing green energy to our customers all over the globe.

Main activities in cleantech

With over 350 VYNCKENEERS, we design and build green and clean energy plants burning biomass and Solid Recovered Fuel (SRF) to produce thermal energy from 1 – 100 MWth and electrical power from 0.5 – 15 MWe. The energy comes individually or in any combination of steam, hot water, thermal oil and hot gas with or without electrical power generation.

Chinese partner search

With 35 up and running plants in China, we are looking for new end customers - such as local governments & industry - who require energy in the form of steam, power or industrial & municipal heating or a combination of them as in CHP plants and who are looking for a green and clean energy solution.

Besides end customers we are also looking for agents who can represent us in the Chinese market. Ideal candidates are people/companies with a technical background and a strong network in the industry (food, paper & pulp, edible oils, coffee, wood, energy contractors..) or local government.

Type Biomass & RDF energy solutions

Website www.vyncke.com

Contact Dieter VAN RYCKEGHEM – Li LIU

Mail dvr@vyncke.com – lli@vyncke.com

简介

VYNCKE是一家家族企业，现在由第四代继承人管理，总部在比利时德斯。自1912年以来，公司为全世界的能源工厂设计、生产和装配生物质和固体回收燃料。目前，我们有4200合作案例，为我们全球的客户供应绿色能源。

核心清洁技术：

350名Vyncke员工共同努力，设计和建造燃烧生物质和固体回收燃料的清洁能源工厂，生产1兆瓦到100兆瓦的热能和0.5兆瓦到15兆瓦的电能。我们的产品设施产能形式多元化，可单独产生蒸汽、热水、导热油和热气，或以组合式形式产能，可伴随或不伴随电力生产。

合作伙伴需求

目前，温克在中国有35家工厂，我们仍在寻找新的终端客户，比如需要蒸汽、能源、工业或城市供暖的当地政府和产业，或是综合需要上述能源形式的热电联产工厂等，正在寻找绿色清洁能源方案的公司或单位。除了终端客户，温克也在寻找能够在中国市场代表我公司的代理人，拥有相关技术背景的人/公司、某产业内的强大网络（食品、造纸、食用油、咖啡、木材、能源承包商或当地政府是最理想的对象.....）
